# Celebrity's Hawaii

The best combination of man-made luxury and earthly pleasures.

If you're talking about square miles, there are certainly places a lot bigger than Hawaii. But inch for inch, Hawaii more than holds its own in richness of experience. Composed of 128 islands and atolls, Hawaii is a study in diversity. From the cool waterfalls of Haleakala National Park to the persistent lava flows of Kilauea Volcano, Hawaii houses a stunning range of climates and ecosystems that boast an equally spectacular variety of flora and fauna.

Celebrity's goal in this journey through Hawaii's wonderfully varied landscape is to help bring context to what you'll see and experience while making you as comfortable as you can be. In addition to expert-led onboard discussions of local art, music, history, geography and wildlife, we also offer ways for you to immerse yourself in the many facets of Hawaii off the ship. Celebrity Xpeditions<sup>SM</sup> travel tours translate Celebrity luxury and standards into opportunities for a more in-depth approach

to your vacation. Available on Hawaii itineraries, the Hana Helicopter Xpedition lets you experience one of the world's most magical destinations from equally magical perspectives.

We also offer countless opportunities for shore excursions, allowing you to explore and experience the islands. In Honolulu alone, your choices range from relaxing on dazzling beaches to touring the city's historic downtown. In Kauai, you might snorkel, kayak, or bike and hike to Jungle Falls.

Celebrity can show you Hawaii like no one else can, because we make it a priority to explore and understand it. And as we keep exploring, we also find new and exciting ways to share our discoveries with you. Welcome to Celebrity's Hawaii.

# Fertile Ground for Wonder

## Hawaii's tropical climate grows more than flora and fauna.

Those who've never been to Hawaii imagine the Aloha State as paradise. They see themselves under a palm tree on some secret beach (maybe even Kauai's Secret Beach), contemplating the rhythms of the infinite ocean. Wondering if there's truth to all that talk about negative ions from the water making you feel more alive. It's the kind of place where you dream about building a little home, spending your days eating fresh tropical fruit and making a point to start appreciating the world around you a little more.

Those who have been to Hawaii know that the reality surpasses even the dream. You'll find the most fabled beaches in the world, where the waters are home to all things exotic, from sealife to surfers. It will be even more beautiful than the pictures you've seen. You'll also meet people who'll warm your heart as much as the Hawaiian sun warms your skin. All of Hawaii is truly a garden; every where you look there are organic displays of color, power, majesty and life. Hawaii is also a land of fascinating contrasts. It's a place that pays daily homage to its ancient Polynesian culture. Yet, you'll realize as you watch the fluorescent lava bubbling

from Kilauea, adding acres of land to the Big Island each year, it's one of the newest places on earth. You'd never know it from the idyllic weather in most locations, but Hawaii claims the spot with the greatest amount of annual rainfall on the planet. And just a short drive away, you can stand in the spot that claims the least.

It's a land of ornate ceremony. But one that celebrates simple pleasures too, like fresh fish grilled over a koa-wood fire. It's a society fond of its tribal origins, yet it's the most diverse state in the U.S., welcoming people from all over the world.

Talk to anyone who's well traveled. Hawaii will be among their favorite places in the world. We think part of the reason is that it has a mystical combination of innocence and infinite wisdom that never fails to inspire wonder.

# The Welcoming West

Why it's a haven for explorers, dreamers, and people who eat and drink.

Maybe it's the weather. Maybe it's the culture. But Coastal California and the Mexican Riviera have always been fertile ground for fun things to do and good things to eat and drink.

Something about the West seems to inspire creativity and artistry. From eclectic architecture to artisans producing everything imaginable, if you're looking for inspiration it appears to have found a home here. Writers, potters, weavers, sculptors, musicians – all up and down the coast, you can scarcely travel a few feet without stopping to marvel that someone “made that”, “sang that”, “built that”, or “cooked that.” And it's clear from their openness and willingness to celebrate each other that residents place value and respect on things that are beautiful, though they give a lot of latitude to just what the definition of beauty is. From the dance of a surfer on a great big wave to the captivating riff of a woman with a guitar, all the West's a stage with countless acts for you to discover.

Plus, you can't miss the West if you have a passion for food and wine. Northern California cuisine blends the quality and attention to detail of your favorite European dishes with a healthy dose of sun and spirit to give it all an extra “zing.” It probably has something to do with terroir, a basic concept to those familiar with viticulture and winemaking. The land imparts flavor to everything that grows in it, and the fertile California soil has a way of producing things that mirror the vivacity and joie de vivre of the people who live there. Over the years,

this focus on quality and freshness has led to international acclaim for the region's wines and culinary achievements.

Further south, Mexico holds culinary surprises as well. If you were asked to associate a flavor with Mexico, you'd probably say “spicy.” The truth is, Mexican food runs the gamut (but thankfully, it can be good and spicy as well). The Mexican Riviera has access to delicious fresh seafood (if you love shrimp, Mazatlán is the place to be) and is also blessed with culinary traditions that date back thousands of years. You'll have the chance to sample dishes you can't find anywhere else, like pozole, a hearty soup that usually includes pork and hominy.

Throughout history, the region from San Francisco to Acapulco has been a veritable seedbed for railroad barons, movie moguls, publishing czars and culinary heroes. Adventure-seekers, foodies, wine aficionados, entrepreneurs: they all share something in common. They're all explorers of sorts. Looking for new things. Things that inspire. Coastal California and the Mexican Riviera deliver.
