Introducing Celebrity Xpeditions.™ The Galapagos: where the unspoiled meets the spoiled.

Come join us on a part of the planet where few have trod before. Where nearly half of the species are found nowhere else in the world. An area so remote that its nearest neighbor, Ecuador, is 600 miles away. Welcome to the islands of the Galapagos and an experience so singular that, among the premium cruiselines, only Celebrity can bring it to you.

It begins aboard Celebrity Xpedition:[™]*

Even as you explore these faraway islands, you'll discover comforts at every turn, from gourmet cuisine and aromatic massages to plush Frette™ bathrobes in your stateroom. And that's just some of the pampering you'll indulge in; with a mere 100 guests, it's easy to feel like you're the most important person on board.

Sailing aboard *Celebrity Xpedition* affords you one more comfort: the knowledge that your ship is designed specifically to safeguard the precious environment you'll be exploring

Let the island-hopping begin.

Quito

The capital of Ecuador, Quito is home to a well-preserved colonial center, the café-lined streets of "new town," and stunning views of the Andes Mountains

Isla Baltra

After arriving on this beautiful island via air, you'll embark or *Celebrity Xpedition* and begin your adventure.

Isla North Seymour

Located off the northern tip of Baltra, this island is home to the largest colony of frigate birds in the Galapagos, as well as blue-footed boobies and playful sea lions.

Isla Española

Among the many sights of this island is Punta Suarez, a rocky point of land where guests may observe various colonies of sea birds as well as other fauna found nowhere else on the planet.

Isla Santa Cruz (Darwin Station and Cerro Dragon)

Here, the Charles Darwin Station offers insights into ongoing research and conservation in the Galapagos. Also located on this island is Cerro Dragon, one of the best places to spy land iguanas

Isla Bartolomé

This small, barren island offers guests the opportunity to observe firsthand its volcanic formations and moon-like landscape.

Isla Isabela (Caleta Tagus)

On the island of Isabela is Caleta Tagus, a trail that surrounds a salt-lake crater. This beautiful region is also known as the "land of marine iguanas"

Isla Fernandina

From a chance to walk on recent lava flows to the opportunity to see the endemic flightless cormorant up close, this island offers it all

Isla Rábida

Known for its striking dark-red color, this island is home to a picturesque saltwater lagoon where white-tailed pintail ducks and flamingos congregate.

Isla Santiago (Puerto Egas)

Santiago's Puerto Egas is the perfect place to explore dark, sandy beaches and spot birds and marine iguanas.

Isla Santa María

home to Devil's Crown, an islet offering incredible snorkeling and scuba diving.
